NOW OPEN

Wild Things: Audubon's North American Mammals

Maximus Gallery

The artist and naturalist, John James Audubon, famous for his work on the birds of America produced the outstanding work on North American mammals in the 19th century. While America's animals were discovered over a period of time going back to the 1600's, they were not described and illustrated in one publication until Audubon and his co-author, the Reverend John Bachman published the Imperial Folio of quadrupeds.

At the time, information was scarce and much of western America was still poorly known. The project proved challenging partly because of the nocturnal habits of many mammals. Ultimately, 150 hand-colored lithographs were printed and published between 1845 and 1848. These beautiful and rare prints are will be on display in the Maximus Gallery.

Free with paid admission.

SATURDAYS

Portal to the Planet

1:00-3:00 PM at the Sea Center

The ocean defines our world: It shapes the surface of our planet and supports all life on Earth. Join us at the Investigation Station to see how the chemistry of ocean water is changing and impacting shelled marine life, and discover some of the innovative ways communities are making smarter choices for the health of the ocean! Fun for all ages.

FREE with paid admission to the Sea Center

Information: jhunt@sbnature2.org or 805-962-2526 ext.110

SATURDAY, NOVEMBER 11

Supak'a: Sharing Chumash Culture

10:00 AM-4:00 PM

Come join a celebration of Chumash culture and participate in an event that showcases the revitalization efforts of Chumash communities and the rich traditions of the indigenous people of this region.

Activities include singing, dancing, storytelling, basket weaving, crafts, games, and much more.

FREE admission to the Museum all day.

Information: kblair@sbnature2.org or 805-682-4711 ext. 143

MONDAY, NOVEMBER 13

Science Pub: Concrete Jungle

6:30-8:00 PM at Dargan's Irish Pub & Restaurant, 18 E. Ortega Street, Santa Barbara

In the past century, American cities have gone from having little, if any, large and charismatic wildlife to being full of it. UCSB Environmental Studies Professor Dr. Peter Alagona will explain how this happened and what it means for wildlife, people, and the urban habitats we all increasingly share.

Information: scoleman@sbnature2.org or 805-682-4711 ext. 170

SUNDAY, NOVEMBER 19

Family Nature Day

10:00 AM-5:00 PM

Enjoy FREE admission and discover the fun and wonder of nature as you explore the Museum's new outdoor exploration area, BaseCamp.

Information: jcanty@sbnature2.org or 805-682-4711 ext. 162

Tickets are required for all public planetarium presentations and are available in the Museum's admissions office with general admission: Members free; non-members \$4.

Weekdays

Wednesdays
3:00 PM Your Cosmic Quest

Fridays
3:00 PM Kids' Space Adventure

Weekends

11:00 AM Twinkle, Twinkle for Little Stars
Noon Black Holes
1:00 PM Kids' Space Adventure
2:00 PM What's Up
3:00 PM Your Cosmic Quest (en español Los Domingos)
