Dear Museum Staff,

I really liked going to the Santa Barbara Museum of Natural History. I really had an adventure. My four favorite rooms are the Marine Room, the Chumash Room, the insects room, and the bird exhibit. I liked the Marine Room because I like looking at the kelp beds and I liked learning about the shark. Another room I liked was the Chumash room because I LOVED listening to the Chumash sounds and I liked learning about the apps. I also liked the Insect Room. I liked it because I liked looking at the alive snake, and I liked looking at the butterflies. Last but not least, I liked the bird exhibit. I liked it because I liked learning about the big and small birds. Thank you for letting us come!

From,
Jonathan
